

A typical 3 x 3 kit includes : quick-fix popup frame,  
18 quick-fix magbars, either 3 straight hangers  
or 6 horizontal magbars and two 'D' end hangers  
**For straight systems horizontal mag bars  
are recommended instead of graphic hangers**  
(Note : Elipse transit case is not included as std)

# 1

Take the inner nodes of the popup  
and with a throw action open out the frame

# 2

Lock the popup frame magnetic  
locking arms into position

# 3

Offer up each magbar to the popup frame node  
and the magbar will snap magnetically into place

# 4

Fit 4 lines of 3 quick-fix magbars vertically and 2 lines of  
3 original magbars horizontally across the front of the frame.  
Then fit 2 lines of 3 quick-fix magbars vertically on  
each side, at the rear of the frame

# 5

Finally unroll each panel and locate onto the magbars  
Line up the panel edge with the centre of each magbar

### Technical Specification (3 x 3 straight)

- Assembled size :  
2235mm (H) x 2700mm (W) x 310mm (D)
- Unit weight inc transit case : 19kg approx
- Single magbar weight : 0.2kg approx
- Single 3 x 3 popup frame weight : 4.3kg approx
- Elipse transit case weight : 9kg approx

Completed System

To unassemble the system reverse  
the instructions remembering to :

Remove each panel from the  
bottom edge and roll with the  
mag tape on the inner edge

**Important note :**  
**Remove all magbars and unfasten  
locking arms before collapsing the  
popup frame**
